## Brief Abstract

### DESCRIPTION

This measure is used to assess whether a practice can produce a register of all cancer patients defined as a 'register of patients with a diagnosis of cancer excluding nonmelanotic skin cancers from 1 April 2003.'

### RATIONALE

Cancer is a clinical priority in all four countries of the United Kingdom. It is recognised that the principal active management of cancers occurs in the secondary care setting. General practitioners often have a key role in the referral and subsequently in providing a support role and in ensuring that care is appropriately co-ordinated. This measure is one of two [Cancer](#) measures. The Cancer set is not evidence-based but does represent Good Professional Practice.

A register is a prerequisite for ensuring follow-up of patients with cancer. The register can be developed prospectively as the intention is to ensure appropriate care and follow-up for patients with a diagnosis of cancer.

## **PRIMARY CLINICAL COMPONENT**

Cancer; patient registry

## **DENOMINATOR DESCRIPTION**

This measure applies to practices whose patient population includes individuals with a diagnosis of cancer (one practice at a time).

## **NUMERATOR DESCRIPTION**

The practice can produce a register of all cancer patients defined as a 'register of patients with a diagnosis of cancer excluding nonmelanotic skin cancers from 1 April 2003'

### **Evidence Supporting the Measure**

## **EVIDENCE SUPPORTING THE CRITERION OF QUALITY**
